

CASE#: 14-001529

I, Derek Friedhoff am writing this statement of my own free will. My statement is: Movie theatre lighting became dim, Previews were about to start. There was an exchange of words between the man shot and the shooter. The man who was shot stood up and bounded like a brief commotion occurred. ~~between~~ between the two occurred before the shooting. I called 911 and spoke with the operator giving them a status report on the shooter and victim, while I was on the phone, another person was giving chest compressions. I noticed he was becoming fatigued so I switched with him and began chest compressions. I gave my phone to my girlfriend to stay on the line until help arrived. I continued chest compressions until help arrived.
